CH-LOGIN (eGovernment)

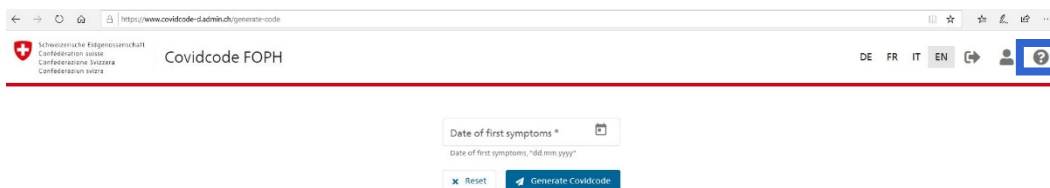

FED-LOGIN (Federal administration)

Generate Covidcode

This page enables you to generate the 12-digit Covidcode for app users who have tested positive. Enter the date of first symptoms and click on «Generate Covidcode». For information on the date of first symptoms, click on the question mark in the upper right-hand corner.

3

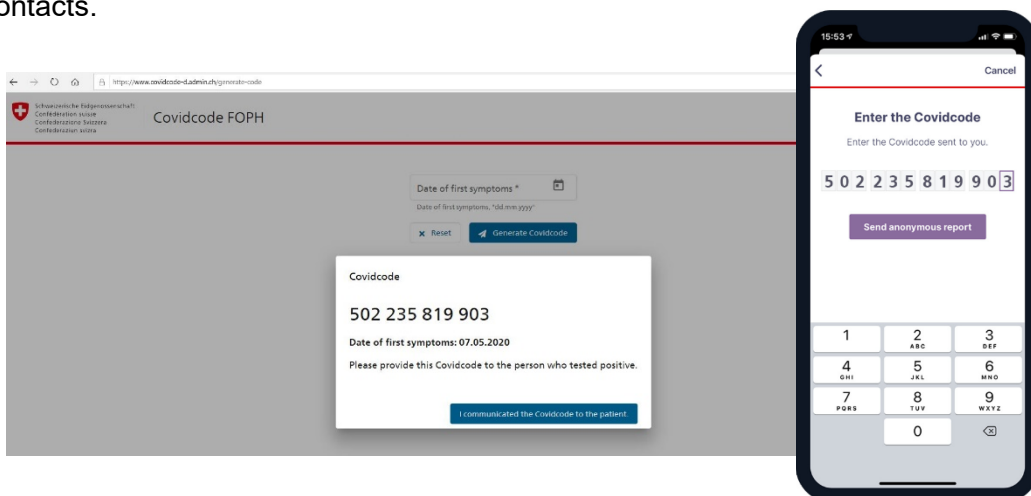

The screenshot shows the 'Covidcode FOPH' web page. At the top, there is a navigation bar with the SwissCovid logo and language options (DE, FR, IT, EN). A question mark icon is highlighted in the top right corner. Below the navigation bar, there is a form with a date picker labeled 'Date of first symptoms *' and a 'Generate Covidcode' button. A 'Reset' button is also visible.

Communicate Covidcode

The generated Covidcode is displayed. Forward the Covidcode to the patient by phone, text message or email so that he/she can enter it in the SwissCovid app and alert contacts.

4

The screenshot shows the 'Covidcode FOPH' web page with a modal dialog box displaying the generated Covidcode: 502 235 819 903. The dialog also shows the date of first symptoms: 07.05.2020 and a button to 'I communicated the Covidcode to the patient'. To the right, a mobile phone is shown displaying the same Covidcode in the SwissCovid app interface.

Click on «I communicated the Covidcode to the patient» to complete the process.
